

INNOVATING HAPPINESS

The Official Gateway 2030 Newsletter - July 2021

GETTING THE CONSTRUCTION SITE READY

Things are moving and the construction is becoming more visible as the days go by. The containers stationed on the former wild parking area have been opened and the fencing has been distributed to site. The construction workers completely fenced out the GW PH1A Construction area to ensure a safe work environment, all this with the approval of the Security team.

The images below illustrate the test runs for temporary baggage route. The changing of the baggage route is necessary to provide sufficient space for the construction works. The contractor has already started placing their site offices in the construction area.

NEW SEWAGE LINES AND STORM WATER LINES

What has been done about the sewage and storm water lines you ask? Well:

- The storm water line on airside has been replaced
- The sewage line on airside for future connection to the buildings has been extended
- The old storm water line on airside that is no longer in use has been removed
- Connection lines (water and sewage) for the construction offices have been placed

FIRST CRANE IS ON SITE

The GW PH1A team is very excited that ANSA has approved the suggested Crane plan. Now, the construction site offices can be placed.

NEW PMO TEAM MEMBER

On July 1st, 2021 Mr. Oviel (Bobby) Gibbs joined the PMO Team as Technical Manager and HS&E Coordinator for the GW2030 Phase 1A Terminal Expansion & BHS works. Bobby is a seasoned professional with ample experience in refinery safety standards and has worked in construction projects in several parts of the region. Bobby is a great addition to the PMO Team and we will surely bring benefits in the Phase 1A project. Please join us in welcoming our latest team member who will ensure that we execute and complete the largest project on the island in a safe and incident free manner, where AAA and the Aruban community in general will be the greatest beneficiaries of all.

WHAT'S NEXT?

- Finalizing site offices of ABC Project Venture.
- Start foundation works.
- Preparations for foundation works and connection to building HA.
- Ground breaking in early September.
- PMO & ABC-PV Team Building Session
